

SERIES R70 DIFFERENTIAL PRESSURE SWITCHES offer complete flexibility in system design and are engineered for proven design, dependability and economy.

RELIABILITY: minimum mechanical and electrical life in excess of 1,000,000 cycles.

REPAIRABILITY: field maintenance can be performed in accord with general maintenance and overhaul procedure.

ADAPTABILITY: mounting brackets and fitting connections present few installation problems. BEC Pressure Controls are available to meet virtually all industrial requirements.

APPLICATIONS:

- NATURAL, FORCED AND INDUCED DRAFT BOILERS.
- EXHAUST FANS AND VENTILATING SYSTEMS.
- AIR-CONDITIONING AND HEAT PUMP CONTROL
- DUST COLLECTING SYSTEMS.
- INSTRUMENT CABINETS-AIR PURGE.
- ROLL-AWAY TYPE FILTERS.
- AIR CURTAINS.
- PRESSURIZED ROOMS AND ENCLOSURES.
- BULK CHEMICAL, FOOD PROCESSING, GRAIN DRYING.
- MANY ADDITIONAL MILITARY AND INDUSTRIAL APPLICATIONS.

SERIES R70 DIFFERENTIAL PRESSURE SWITCHES (.15 to 30 Inches Water Column)

Ranges shown below are for listed switches. Higher ranges are possible with the SERIES R70. Other series are available with a wider choice of ranges.

Calibration is with diaphragm vertical unless specified.
